The Fraunhofer Project Group Translational Medicine and Pharmacology TMP is working in the areas of preclinical and clinical model validation and drug research. Our goal is to develop predictive pharmacological animal models in order to test the efficacy and safety of new drugs, before they enter clinical trials. Our main expertise lies in the field of inflammation including sepsis, rheumatology, pain and neurodegenerative disorders.

We are building a new animal facility in Frankfurt am Main, Germany. Therefore, we are seeking a **veterinary physician as post-doc**.

Your tasks will be:
- Leading your own research project
- Publish papers in international scientific journals
- Being responsible for our new animal facility
- Supporting the scientists with your veterinary knowledge

Your qualifications:
- You hold a degree in veterinary medicine
- You have recently been awarded your PhD
- You have at least 3 years of experience in working with experimental animals
- You are a citizen of the European Union
- Basic knowledge of German is an advantage

What we offer:
- Interesting tasks with responsibility
- Working in an interdisciplinary team
- Possibility to qualify yourself as a specialist in laboratory animal medicine

Salary will be according to the civil service collective labour agreement (TVöD Bund).
