

PhD POSITION AVAILABLE

We are looking for a veterinarian desiring to do a PhD in clinical sciences.

This PhD would make part of a global research project about developmental orthopedic diseases initiated by the Walloon Region (Belgium), more specifically a biomechanic, transcriptomic and epigenetic approach for osteochondrosis dissecans disease (OCD).

Research will be mainly performed in the Research and Development Center of Mont-Le-Soie, Vielsalm (Belgium) in collaboration with the equine Walloon Region breeders.

The candidate should ideally:

- ✓ Be diplomate in Veterinary medicine
- ✓ Have interest in sportive medicine and equine locomotion
- ✓ Have experience with foals and manipulation of young horses
- ✓ Show motivation for the research and for acquiring the knowledge needed for genomic studies
- ✓ Be able to participate in the different activities of the center as a collaborator
- ✓ Be a holder of a driver's license
- ✓ Be able to communicate in English and French (written and spoken)

Autonomy, rigor and team working capacities will be highly appreciated and considered essential for the success of the project.

Interested candidates are kindly asked to submit their CV and motivation letter to Dr. Jean-Philippe Lejeune: jph.lejeune@uliege.be
