Small Animal and Large Animal Diagnostic Imaging Residency

The Department of Clinical Sciences (Diagnostic Imaging Section) of the University of Liège Belgium is opening 2 position for a 3-year ECVDI residency (1 Small Animal Track and 1 Large Animal Track), starting **October 1, 2021**.

Pre-requisites are the completion of a one-year rotating internship or an equivalent practical experience. Knowledge of spoken French is required in order to interact with students or an intensive language course should be followed. A good English knowledge is required.

The team is composed of 4 ECVDI diplomates, 1 senior clinician, 3 residents (2 small animal and 1 large animal), a diagnostic imaging intern and 2 technicians.
The Diagnostic Imaging Section is equipped with DR, ultrasound, CT scan (64 slices), 1.5 T MRI and a Standing Equine MRI unit (Hallmarq).

The resident participates in everyday clinical activity (mainly in small animal but also in large animal imaging) and has regular (1/3-4 weeks) on-call rotations for night and week-end duties. She/he will be actively involved in clinical teaching to the students of the 2 last clinical years.

The candidate should have enough self-awareness and good interpersonal skills, be a strong team player and sound communicator. She/he should be willing to accept feedback and make adjustments when needed, wish to operate in a multidisciplinary collaborative environment and have the ability to cope with change and accept responsibilities.

The candidate may continue in a PhD program after the residency.

**Deadline for application is May 31st 2021.**

Application should include a letter of intent, 2 letters of recommendation and a curriculum vitae. After a preliminary selection, the candidates will be interviewed in June.

For further information regarding the residency program, please contact Valeria Busoni, Residency Program Director, email **vbusoni@uliege.be**.
