External call

JOB DESCRIPTION

The veterinary care assistant nurse:
- helps to perform, under the supervision of clinicians, acts relating to the hygiene and treatment of patients by understanding the chemical, physical and biological risks;
- plays a key role in teaching students the basic rules of chemical, physical and biological risks;
- participates in the preparation of anaesthesia protocols, patient follow-up and assists the clinician in the preparation room, operating theatre and recovery room;
- participates in the management of anaesthesia for animals requiring additional examinations (endoscopy, medical imaging, etc.);
- inventories, prepares, arranges and ensures the proper functioning and hygiene of the equipment in the premises related to anaesthesia;
- manages the pharmacy, including drugs register and prepares patients medicines for anaesthesia;
- answers questions from clinicians and students regarding animals taken care for by the anaesthesiology service;
- will ensure that they apply and develop their knowledge of biology, physiology, anatomy, new technologies, and is encouraged to pursue internships and training for nurse in anaesthesia.

KNOWLEDGE, QUALIFICATIONS AND EXPERIENCE

- Diploma in veterinary nursing (bachelor level) or nursing (Bachelor or nursing diploma);
- Previous experience in a veterinary practice (asset);
- Basic computer skills (MS Office, SAP is an asset);
- Language skills: spoken and written French, knowledge of English (any other language knowledge is an asset);
- Medical fitness: no allergy to animal hair.

Skills
- Know and apply the rules of operation during an anaesthesia: hygiene, biosecurity rules, order, respect of the timing, ...;
- Knowledge of anaesthesia machines and machines for patient monitoring and being able to use them appropriately (pulse oximetry, Doppler, blood pressure monitoring, capnography, electrocardiogram, etc.);
- Know and put into practice the rules of patient restraint and being able to practice frequent nursing interventions (e.g. blood tests, placement of an iv catheter, ...);
- Contribute positively to the proper functioning of the team thanks to a keen sense of contact and collaboration; communicate easily with all interlocutors;
- Demonstrate manual skills and resistance to stress;
- Excellent sense of organization, priorities, flexibility, autonomy.
CONDITIONS OF EMPLOYMENT AND BENEFITS

- Full-time fixed-term contract, 6 months renewable;
- Grade: specialized agent (Bachelor’s degree);
- Basic monthly gross full-time salary: €2,521.14 (scale 224);
- Possibility to value the entire seniority acquired in the public sector (full-time) and up to 6 years of seniority (related to the function) in the private sector, with a certificate;
- Provision of meal vouchers (value of €5.00);
- Supplementary pension plan (3% of gross salary);
- End of year allowances and holiday allowance;
- Annual holiday scheme of 27 days minimum (for full time, depending on the benefits of the previous year) and extra-legal leave;
- Full reimbursement of journeys home/place of work made by public transport and lump sum reimbursement of journeys made by bicycle;
- Wide range of training courses available;
- Schedules: participation in hourly rotations during the day;
- Team work (students, clinicians, colleagues).
